We ALFATECH INDUSTRIES (I) Pvt Ltd are committed to Design Manufacturing and Supply of All Types of Chemical, Pharma, Paint, Equipment's. With increase in customer total satisfaction by delivery on time delivery with excellent quality and continual improvement is our quality management system.

QUALITY OBJECTIVES

1. On-me Product Delivery To Customer
2. Reduce Customer Complaints.
3. Reduce In House Rework & Rejecon
4. Increase Sales Turnover
5. Increase Customer Sasfacon Index
6. Training To All Employees

Quality System & Personal

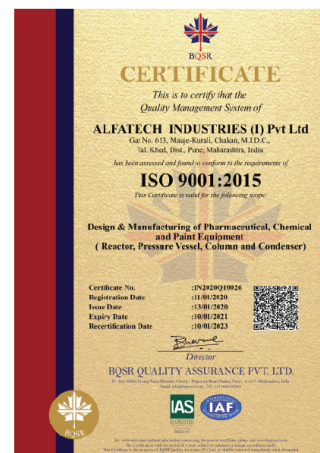

Alfatech has robust quality system that ensure that the right material is used, and the right procedure is followed in the conversaon of raw material to finishd product. we have a

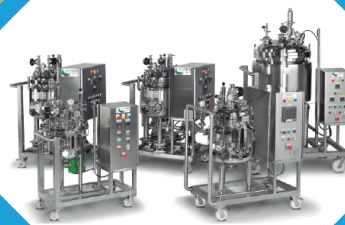

dedicated quality team.
strict compliance with procedure and adherence to QAP
Alfatech and quality are synonymous. we take great care at every stage of the manufacturing process from material procurement, ll painng and dispatch. all the incoming material is first tested by PMI, all shas are ultrasonically tested. the best quality of filler wire is used to ensure strong and proper welds. polishing and buffing are done with abrasive media which are free from iron contant. roughness is as per asme bpe requirements measured by surface roughness tester (Ra Meter)

Quality Management

- i. The basic principle of operaon is that we train work force to deliver the quality standards right from beginning. We movate people to give their best & thus follow principle of "Self Directed Teams"
- ii. Shop Inspecon & Records: Tank-wise & staon-wiseinspecon formats are followed on shop floor to record the observaons & findings.
- iii. QAC prepares Order Summary catching the key requirements of the orders. Customer approved QAP along with Order Summary is circulated to Production.
